Safeguarding

[REDACTED] /2015 [REDACTED]

Comments: Spoke to Chris, who wrote into CQC. The concern was around medication and the wrong(missed) tablet from February - May 2015. This was because the drug was not written on the chart. Chris explained that the person was put into fluid restriction, but this was not monitored and believes this restriction went on longer than necessary, until the SALT raised this as a concern. This was raised with the LA and caller believes that the manager did not tell the whole truth the LA about the length of time the restriction took place. The LA concluded that the investigation was unfounded. [REDACTED]
